

Mission Health Communities Applies Technology to Navigate Complex New Reimbursement Systems

Dedicated to enhancing the lives of those we serve, Mission Health Communities is a leading provider of senior living and skilled rehabilitation communities headquartered in Tampa, Florida. We manage and operate Communities in Georgia, Kansas, Minnesota, Missouri, Tennessee, and Wisconsin, connected by a set of shared values. In addition to our dozens of skilled nursing facilities operated by Mission Health Communities, Mission Management Services provides short-term turnaround Management for numerous care communities in receivership. Online at missionhealthcommunities.com and missionmanagementservices.com.

PROGRAM PLAN

April, 2025

Early Adoption Program for Rolling Hills Health and Rehab and BLANK

- Integration of Technology and Automation to assist in the navigation of complex reimbursement systems as well as to promote quality of care with the use of data
- Provides proactive solutions that have not existed prior to eBrief

SOLUTION

Level of Care

Skilled Nursing Facilities

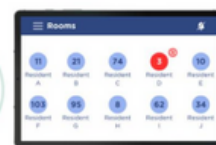

System Components

eBrief™ Sensor Insert
Applied to brief or pull-up

Room Reader
Detects incontinence event

Caretaker App
Receives real-time alerts

Expectations

Regulations are expansive in skilled nursing environments and reimbursement systems are tricky. Introducing tools that assist staff in meeting these demands with less burden and workload can not only promote a better morale and culture, but it can also lead to more automations in documentation, back-up documentation, as well as more insights to provide care plans that are more centered around the person.

CHANGES ADDRESSED

- Complex Reimbursement Systems and extensive expectations of regulatory mandates

PDPM is a new and complex challenge all organizations that bill Medicare are working to navigate and without sacrificing negative impacts to reimbursement in the meantime.

- Internet Availability

Rural communities accross America still struggle with limited resources for finding reliable and appropriate internet connections. eBrief works with each early adopter to identify areas of potential improvement that can help build future versions that can meet these challenges with ease.
